Mark & Andy,

Attached is the draft work plan for PFAS sample collection & analysis on the NH St Gobain facility. In short ~ 100 samples for LC/MS analysis (mainly impinger liquids, XAD, and filters. The SUMMA canisters would be for Theran to analyze. Could you two read through this and see if there are any "go/ no go" issues that you see? Perhaps we could get together at the beginning of next week to discuss. I'll set up a meeting to do so.

John
